

Wolf-Fox Walleye Anglers

Please release Sonic Tagged Walleye!

100 adult walleye on the Fox and Wolf Rivers and Lake Winnebago are being surgically implanted with Sonic Tags this spring for a 3 year movement study. Watch for blue monofilament sutures on the belly, and a second yellow streamer tag on their back behind the usual numbered tag. Please release these fish so they continue to provide valuable data.

If you do harvest one of these fish, please contact Kendall Kamke, DNR Walleye Biologist, Oshkosh at 920-424-7880 to arrange returning the small black tag for reuse.

The \$32,000 for these tags was completely donated by 17 local sports clubs!

Battle on 'Bago, Otter St. Fishing Club, Lake Poygan Sportsman's Club, Walleyes for Tomorrow, East Shore Conservation Alliance, Fisherman's Rd Fishing Club, Sheboygan Walleye Club, Lower Cliff Fishing Club, West Shore Fishing Club, Payne's Point Hook and Spear, Quinney Fishing Club, Berlin Conservation Club, Outdoor Conservation Club, Brothertown Fishing Club, Butte des Morts Conservation Club, Twin City Rod and Gun Club, and Oakfield Conservation Club
